PROFILE

AI & Data Science Engineer who builds software, not just models. I develop web applications, backend systems, automation tools, AI-powered workflows, and data-driven dashboards across Python, JavaScript/TypeScript, React, Node.js, APIs, SQL, and modern AI technologies. . From building automation bots and deploying my own web applications to developing analytics platforms and AI solutions, I enjoy taking an idea from **concept → code → working product**. I'm comfortable working across the stack, connecting frontend, backend, databases, automation, AI, and analytics to build practical solutions that solve real business problems.

CORE STACK

Software Engineering
Python · Java · JavaScript · TypeScript · OOP · Data Structures & Algorithms · REST API Development · Backend Development · Full-Stack Development

Web & Application Development
React · HTML · CSS · Node.js · Express.js · FastAPI · Flask · Spring Boot · Responsive Web Development · Dashboard Development

Automation & Workflow Engineering
Selenium · Browser Automation · Web Automation · Task Automation · Workflow Automation · Process Automation · Automation Scripting · Dynamic Element Handling · Browser Interaction Workflows

AI & Intelligent Systems
Machine Learning · Deep Learning · TensorFlow · PyTorch · NLP · Generative AI · LLMs · RAG · AI Agents · Gemini · Prompt Engineering · AI Evaluation

Data Engineering & Analytics
Python · SQL · Pandas · NumPy · Data Cleaning · EDA · Statistical Analysis · Data Validation · Data Modelling

Business Intelligence & Visualisation
Power BI · Tableau · DAX · Power Query · KPI Design · Interactive Dashboards · Data Visualisation · Business Reporting

Databases & Data Access
PostgreSQL · MySQL · SQLite · H2 · SQLAlchemy · Database Design · Querying

Cloud, DevOps & Development Tools
AWS · Docker · CI/CD · Git · GitHub · Maven · VS Code · Jupyter · Google Colab · Vercel

PROFESSIONAL EXPERIENCE

Techno-Functional Consultant | PACT Software Services Pvt. Ltd. | 2026-Present

- Translate client requirements into functional specifications and software workflows for ERP modules, bridging business processes with implementation teams.
- Analyse business processes, identify workflow gaps, and recommend ERP configuration and process improvements.
- Coordinate with clients, product teams, and developers to clarify requirements, troubleshoot functional issues, and define system enhancements.
- Execute module testing, data validation, troubleshooting, and UAT; document defects and validate fixes against expected workflows.

AI Data Annotation & Evaluation Specialist | Innodata | 2026

- Performed AI data annotation and evaluation in production workflows using project-specific guidelines and structured quality criteria.
- Detected annotation errors, inconsistencies, and edge cases; escalated ambiguous cases and maintained consistent labelling decisions.
- Completed qualification for Innodata's C/FTE slide-deck annotation workflow and progressed to live production queues.

FEATURED BUILDS

LinkedIn Job Application Automation Bot | *Python • Selenium • Browser Automation*
Built browser automation for repetitive job-application workflows with configurable interaction timing, element handling, and workflow logic.

Personal Developer Portfolio | *React • TypeScript • GitHub • Vercel*
Designed and deployed a responsive portfolio website with project showcases, reusable UI sections, responsive layouts, and a Git-based deployment workflow.

Synapse Flow - AI Workflow Automation | *Node.js • TypeScript • Gemini • PostgreSQL*
Designed an AI workflow for intent extraction, business-rule validation, automated processing, human-in-the-loop review, and audit logging.

NexaDash - Business Intelligence Platform | *React • TypeScript • Recharts*
Developed responsive dashboard components for revenue analytics, category distribution, order tracking, and reusable KPI visualisations.

Customer Retention & Churn Analytics | *Python • SQL • Power BI*
Analysed subscription, tenure, usage, and customer behaviour data to identify churn drivers and high-risk segments; defined retention KPIs and dashboard views.

EDUCATION & SELECTED CREDENTIALS

Bachelor of Engineering (B.E.), Artificial Intelligence & Data Science Sep 2022 - Sep 2026|
Methodist College of Engineering & Technology, Hyderabad
Google Data Analytics • Microsoft Power BI Data Analyst • IBM SkillsBuild AI & Data Science • Google Cloud ML & AI

Target roles: Software Developer • Full-Stack / Web Developer • Python Developer • Automation Engineer • AI/ML Engineer • Data/BI Developer
